Education

- **University of Manchester** — Manchester, UK
  Bachelor of Science in Computer Science; Year 2 GPA: ***71/100*** — *Sep. 2024 – Jul. 2027*
  - **Relevant Courses:** Data Structures and Algorithms, Software Engineering, Computer Architecture

Experience

- **University of Liverpool – Institute of Population Health** — Liverpool, UK
  Research Intern – Health Data Privacy & Security — *Jun. 2026 – Aug. 2026*
  - Conducted a **GDPR-focused** security and privacy evaluation of a digital health platform, assessing **role-based access control (RBAC)** and **JWT API authentication** as part of a multi-institution clinical research collaboration.
  - Co-authoring a peer-reviewed commentary on GDPR compliance and cybersecurity in digital health applications for submission to an academic journal.
- **University of Manchester – School of Engineering** — Manchester, UK
  Departmental Summer Research Intern — *Jun. 2026 – Aug. 2026*
  - Developed a handheld test and development kit for research into the **BrokenWire attack** (NDSS '23) using FPGA-based digital logic with external hardware.
  - Designed and tested a custom PCB and implemented **Verilog** logic for preamble transmission required to replicate the attack in a controlled lab environment.
- **Travel Radar** — Remote
  App Development Intern — *Jun. 2026 – Aug. 2026*
  - Developed and implemented new functionalities for a production mobile application using **Flutter/Dart and Android Studio**.
  - Worked within an **Agile development process**, contributing to sprint-based development, testing, debugging, and delivery.
- **Hackchester** — Manchester, UK
  Events Officer and Cybersecurity Competitor — *Nov. 2025 – Jun. 2026*
  - Organise and deliver weekly beginner-friendly cybersecurity workshops for the University of Manchester cybersecurity society, and represent Hackchester in national and international **Capture-the-Flag** competitions using **Wireshark, Burp Suite, Volatility3, and Ghidra** (results under Honours).
- **Clevorra** — Istanbul, Turkey
  Co-Founder and Data/Content Lead (Part-time) — *Oct. 2024 – Jul. 2025*
  - Co-founded an AI-powered test preparation platform for standardized tests (SAT, ACT, GRE), curating a dataset of 1500–2000+ questions in JSON format (clevorra.com).

Projects

- **MCP-Scanner: CI-Style Security Scanning Pipeline**:
  - Built a Python static/semantic-analysis pipeline scanning AI agent tool servers for tool-poisoning and prompt-injection vulnerabilities, packaged as a CLI for automated scanning; open-sourced on GitHub.
- **Automated Bug Bounty Orchestration Pipeline**:
  - Engineered a multi-stage Python pipeline (discovery, recon, testing, reporting) automating bug-bounty workflows across multiple platform APIs, with a policy-driven rules engine enforcing guardrails and human-approval gates.
- **Meal Dealer (Web Platform)**:
  - Led development of a user-facing web application focused on usability and data-driven decision making.
  - Designed backend workflows and managed structured datasets supporting application logic.
  - Collaborated across frontend and backend components to deliver a complete solution.

Honours

- **Great Uni Hackathon – University of Manchester**:
  - Winner of the **Hackchester Society CTF Challenge**, solving four challenges under time constraints.
- **Capture The Flag Competitions**:
  - Ranked **951/8,130** in Hack The Box Cyber Apocalypse 2025.
  - Ranked **144/6,252** in Industrial Intrusion CTF.
