Education

- **University of Manchester** — Manchester, UK
  *Bachelor of Science in Computer Science with Industrial Experience; Year 2 GPA: **71/100*** — *Sep. 2024 - July 2028*
  - **Relevant Courses:** Data Structures and Algorithms, Software Engineering, Computer Architecture

Experience

- **University of Liverpool – Institute of Population Health** — Liverpool, UK
  Research Intern – Health Data Privacy & Security — *Jun. 2026 – Aug. 2026*
  - Conducted a **GDPR-focused** security and privacy evaluation of a digital health platform, assessing **role-based access control (RBAC)** and **JWT API authentication** as part of a multi-institution clinical research collaboration.
- **University of Manchester – School of Engineering** — Manchester, UK
  Departmental Summer Research Intern — *Jun. 2026 – Aug. 2026*
  - Developed a handheld test and development kit for research into the **BrokenWire attack** (NDSS '23), combining FPGA-based digital logic with external hardware.
- **Travel Radar** — [Location]
  App Development Intern — *Jun. 2026 – Aug. 2026*
  - Developed and implemented new functionalities for a production mobile application using **Flutter and Dart**, working within an Agile, sprint-based delivery process.
- **Hackchester** — Manchester, UK
  Events Officer and Cybersecurity Competitor — *Nov. 2025 – Present*
  - Organize weekly beginner-friendly cybersecurity workshops covering **OWASP top 10** and web exploitation, and recruit teams for CTF competitions (results under Honours).
- **Clevorra** — Istanbul, Turkey
  Co-Founder and Data/Content Lead (Part-time) — *Oct. 2024 – Jul. 2025*
  - Co-founded an **AI-powered** test preparation platform for standardized tests (**SAT, ACT, GRE**), curating and structuring a dataset of **1500–2000+ questions** in JSON format (clevorra.com).

Projects

- **Meal Dealer (Full-Stack Web App)**:
  - Designed and developed a full-stack web application recommending optimal meal-deal combinations based on user dietary filters, using **Supabase**, **PostgreSQL**, and **React.js**.
- **Cybersecurity Honeypot & Logging Infrastructure**:
  - Built a log ingestion and analysis pipeline using the **ELK Stack** integrated with a **Cowrie honeypot**, configuring pipelines (**Filebeat, Logstash, Elasticsearch, Kibana**) and analyzing data for trends and anomalies.
- **MCP-Scanner: AI Agent Tool-Poisoning Detector**:
  - Built a Python security scanner detecting **tool-poisoning**, **prompt-injection**, and **rug-pull** attacks in **MCP** servers used by AI agents, validated against real disclosed attacks; open-sourced on GitHub.
- **Automated Bug Bounty Recon & Reporting Pipeline**:
  - Engineered a **Python** pipeline automating scope-gated reconnaissance, vulnerability triage, and report drafting across the **HackerOne** and **Intigriti** APIs, with human-approval gates before active testing.

Honours

- **Great Uni Hackathon – University of Manchester**:
  - Winner of the **Hackchester Society CTF Challenge**, solving four challenges under time constraints.
- **Capture The Flag Competitions**:
  - Ranked **951/8,130** in Hack The Box Cyber Apocalypse 2025.
  - Ranked **144/6,252** in Industrial Intrusion CTF.

Skills & Technologies

2+ **C**, **C++**, **Python**, **Java**, Object-Oriented Programming(OOP), **HTML**, **CSS**, **JS**, **SQL**, PHP, Verilog

1+ **Linux/Unix**, **Git**, **JSON**, Virtual Machines, Cyber Security, RISC-V Assembly

< 1 Microcontrollers, Raspberry Pi, Open Source Development
